(54) Title: PROTECTION OF GERMINATING SEED AND PILLS CONTAINING PESTICIDES

(57) Abstract: The invention relates to a method for the protection of germinating seed from pesticide, wherein seed-containing pellets and pesticide-containing pellets are sown separately but simultaneously. According to a preferred embodiment of the invention, the pesticide-containing pellets have substantially the same shape and diameter as the seed-containing pellets, and the pesticide-containing pellets comprise the exact dosis of pesticide that is sufficient for one seed germ. Generally, the pellets with pesticide have a diameter ranging from 0.5-5.0 mm.
